Investment

- USD 2,000 (including examination & membership fees)

COURSE OUTLINE

Privacy Program Management

Modules covered

Module 1: Introduction to Privacy Program Management

Identifies privacy program management responsibilities, and describes the role of accountability in privacy program management.

Module 2: Privacy Governance

Examines considerations for developing and implementing a privacy program, including the position of the privacy function within the organisation, role of the DPO, program scope and charter, privacy strategy, support and ongoing involvement of key functions and privacy frameworks.

Module 3: Applicable laws and regulations

Discusses the regulatory environment, common elements across jurisdictions and strategies for aligning compliance with organizational strategy.

Module 4: Data Assessments

Relates practical processes for creating and using data inventories / maps, gap analyses, privacy assessments, privacy impact assessments / data protection impact assessments and vendor assessments.

Module 5: Policies

Describes common types of privacy-related policies, outlines components and offers strategies for implementation.

Module 6: Data Subject Rights

Discusses operational considerations for communicating and ensuring data subject rights, including privacy notice, choice and consent, access and rectification, data portability, and erasure and the right to be forgotten.

Module 7: Training and Awareness

Outlines strategies for developing and implementing privacy training and awareness programs.

Module 8: Protecting Personal Information

Examines a holistic approach to protecting personal information through privacy by design.

Module 9: Data Breach Incident Plans

Provides guidance on planning and responding to a data security incident or breach.

Module 10: Monitoring and Auditing Program Performance

Relates common practices for monitoring, measuring, analysing and auditing privacy program performance.
