

# Hands-on Data Protection & Cyber Security Workshop

The Hands-on Data Protection Officer (DPO) and Cyber Security course by Straits Interactive is the first of its kind in India as well as the ASEAN region. The course offers a hands-on training programme in order to meet the worldwide shortage of Data Protection Officers.

Based on a practical and workshop-format approach, this two-day course provides aspiring DPO's with the competencies they need to devise and implement policies & practices required by data protection laws to support their organisation's compliance cost-effectively, efficiently and productively.

We don't just train you – we show you how to assess and treat compliance risks in the context of your organisation's activities.

At the end of the course, you will have a Compliance Manual for your organisation in addition to data privacy management software and other tools that you may need!

... with roadmap to International Certification

## Learning Outcomes:

- Step-by-step plan and checklist for DPOs to start their privacy programme management IMMEDIATELY
- Manage compliance using the online Data Protection Management System (DPMS)
- Customise your Data Privacy & Information Security Policy for your organisation (based on ISO27002)
- Get guidance & best practices from experienced and internationally certified privacy practitioners

## COURSE OVERVIEW

### Module 1

Complying with the common Privacy Principles from an information life cycle perspective

Hands-on Project 1: Identify risks and potential breaches in your current organisation.

### Module 2

Roles & Responsibilities of the Data Protection Officer - how to create a privacy programme and compliance framework

Hands-on Project 2: Conduct a privacy audit and Privacy Impact Assessment (PIA) of your own organisation and put together a compliance framework.

### Module 3

Information Security: Policy, Templates & Tools

Hands-on Project 3: Create, customise and Implement measures to address privacy and information security gaps in your own organisation.

### Module 4

Privacy Programme Management & Breach Reporting Procedures Assessment

Project Presentation on effective Privacy / Data privacy programme management.

- Compliance Manual tailored for your organisation
- DPO Competency Certificate

**EARLY BIRD DISCOUNT AVAILABLE!**

"Very Interactive workshop that got us involved as much as we could. By the end of the workshop, we've done half the work that needs to be done. So far one of the best workshops I've attended."

*Prita, Ramsay Sime Darby Sdn Bhd*

"I find this course very practical and it actually gives you a good understanding of how to move forward. Implementing PDPA is not just putting up notices here and there. There are so many things to consider, like infosec policy, BYOD policy, etc., that we have to put in place. Not only that, there's such a thing as audit. Overall I find it useful and if you really want to implement PDPA, this is the workshop that you have to go for."

*Teh Ah Huat, UMMC*

"The usefulness of this course is that it is put in a structured manner on how to go about assessing, improving and sustaining the whole issue of PDPA. I think that the most useful thing is that you have developed a good software to support the effort."

*May Lim, World Executive*
